Dear Mr. Regulski:

Re: Tentative Approval of ECDC Clay Mine, East Carbon Development Company, M/015/062, Emery County, Utah

The Division has completed its review of your April 16, 1993 response letter. After reviewing the information, the Division is ready to make a tentative approval of the plan, with the condition that the comments below are addressed. The comments are listed below under the applicable Minerals Rule heading. Please format your response in a similar fashion.

R647-004-104 - Operator's, Surface and Mineral Ownership

Please provide the Division with an original signature to the the signature page portion of the Large Mining Notice. You will find attached another page 10 of the LMO-NOI form. (HWS)

R647-004-105: - Maps, Drawings & Photographs

105.3 - Maps, drawings or cross-sections

The operator still needs to provide the Division with a Reclamation Treatments map. The map should show how specific area of the site will be reclaimed. We assume that pits, pads and roads will be reclaimed differently than one another. The map will provide the Division with a rough idea of the extent of reclamation and configuration of the site, after mining. (HWS)

R647-004-113 - Surety

The reclamation contract and surety will need to be provided to the Division at least two weeks prior to the next Board meeting. The next Board meeting is on May 26, 1993. Board packages are due May 10th. The surety estimate came out to \$20,600.

General Comments

Sincerely,
D. Wayne Hedberg
Minerals Permit Supervisor
